

JOE KUANG _____

 joekuang.com joekuang@berkeley.edu

 San Francisco, CA

 (415) 816-9177

 /joekuang

Education	University of California, Berkeley	June 2015 – December 2017 (Expected)
	Electrical Engineering & Computer Science, Bachelor of Science	
	Cumulative GPA: 3.91	

June 2015 – December 2017 (Expected)

Electrical Engineering & Computer Science, Bachelor of Science

Cumulative GPA: 3.91

Coursework **Completed:** Data Structures, Machine Structures, Artificial Intelligence
In Progress: Algorithms, Network Architecture, Computer Security

Completed: Data Structures, Machine Structures, Artificial Intelligence

In Progress: Algorithms, Network Architecture, Computer Security

Employment & Experience	Software Engineer Intern	May 2016 – August 2016
	Micron Technology, Inc.	Maintained the automation software as part of the SSD Validation and Test Automation team. Facilitated and provided support for various testing groups (Firmware, API, Regression). Developed a tool to oversee and manage server inventory.

May 2016 – August 2016

Micron Technology, Inc.

Maintained the automation software as part of the SSD Validation and Test Automation team. Facilitated and provided support for various testing groups (Firmware, API, Regression). Developed a tool to oversee and manage server inventory.

January 2016 – May 2016

CS61B, UC Berkeley

Guided students in lab sections for Data Structures. Assisted TA's in office hours and homework 'parties'.

October 2015 - Present

Cal Animage Alpha, UC Berkeley

Headed a complete redesign of the CAA main page. Hosted weekly showings over the semester. Responsible for maintaining CAA tech assets.

August 2014 – May 2015

MESA, Cosumnes River College

Provided tutoring for CRC students in all offered programming courses. Held impromptu review sessions throughout the semester. Participated in meetings to grasp more effective methods of teaching.

Projects **C4** c4.joekuang.com
Javascript, Node.js, Socket.io
Web browser mini-game; based on the trademark game *Connect Four*. Supports one-vs-one multiplayer, spectators, and identification icons. Client-side displays are updated in realtime to correspond with client connects, disconnects, and gameplay.

Web browser mini-game; based on the trademark game *Connect Four*. Supports one-vs-one multiplayer, spectators, and identification icons. Client-side displays are updated in realtime to correspond with client connects, disconnects, and gameplay.

Gitlet

Java

A slim version-control system that closely mimicked Git. Designed internal file structures and implemented various basic features such as: backup commits, branches, merging, and remote usage.

Seam Carving

Java, Python

An application that applies the image resizing technique *seam carving* on a given image. Uses a gradient calculation method to determine the least important parts of the image.

Scheme Interpreter

Python

An interpreter for a subset of the Scheme language. Implemented support for tail recursion optimization and user-defined Stream objects.

Relevant Skills **Languages:** Python, Java, C/C++, Groovy, Javascript, SQL, x86 and MIPS Assembly
Frameworks and Tools: jQuery, Node.js, Socket.io, Jenkins
